1. Organisation Overview

1.1 Name

Salv-7 Tech Solutions (STS7)

1.2 Brief History

STS7 is a newly established technology services company founded in 2026 in Tzaneen, Limpopo. The company was created in response to the growing need for affordable and reliable technology services among local individuals and small businesses. STS7 aims to provide practical technology solutions, including website development, software development, computer repairs, networking and IT support. As a new business, STS7 intends to build a strong reputation through quality services, customer satisfaction and continued growth within the local community.

1.3 Mission and Vision

- Mission: To provide individuals and small organisations with affordable, reliable and quality technology solutions that help them improve their work, overcome technical challenges and achieve their goals.
- Vision: To grow from a trusted local technology provider into a recognised technology company serving large national and international organisations through innovative and reliable technology solutions.

1.4 Target Audience

Primary audience:

- Small businesses and start-ups
- Individuals who need technology services
- Local organisations that don't have their own IT department (e.g small Bakery, barber shops etc)

Secondary audience:

- Medium-sized organisations that need external IT services (e.g Private Schools, growing Logistics company etc)
- Organisations looking for affordable website/software development

2. Website Goals and Objectives

2.1 Specific Goals

- **Inform visitors about STS7** — clearly explain who STS7 is, its mission, vision and what the company does.
- **Showcase STS7's services** — present the technology services offered, including website development, software development, computer repairs, networking, IT support and consulting.
- **Generate potential clients** — encourage visitors who need technology services to consider STS7.
- **Allow customers to request quotations** — provide an easy way for potential clients to describe their needs and request a quotation.
- **Showcase previous work/projects** — demonstrate STS7's capabilities through a portfolio of completed or sample projects.
- **Make it easy to contact STS7** — provide clear contact information and an enquiry/contact form for visitors.

2.2 Key Performance Indicators (KPIs)

- **KPI 1:** Attract **50–70 website visitors per month** during the first few months. Increase website traffic by **30% within three months**.
- **KPI 2:** Have at least **40% of visitors view the Services page**.
- **KPI 3:** At least 10 potential client enquiries per month.
- **KPI 4:** At least 5 quotation requests per month.
- **KPI 5:** At least **30% of visitors view the Portfolio/Projects page.**
- **KPI 6:** Receive at least **10 contact/enquiry submissions per month.**

3. Current Website Analysis

STS7 currently does not have an official website because the organisation was established in 2026. As a new technology services company, STS7 currently has limited online visibility and does not have a central platform where potential customers can learn about its services, view previous work or request quotations.

3.1 Strengths

- As a new organisation, STS7 has the opportunity to establish its online presence from the beginning.

- The website can be designed specifically around the needs of its target audience.
- The organisation can create a consistent professional brand across its online presence.

3.2 Weaknesses

- Potential customers currently have no official website where they can learn about STS7.
- There is no online platform for customers to view the services offered.
- Customers cannot submit quotation requests or enquiries through a website.
- STS7 has no online portfolio to showcase previous or sample projects.

3.3 Opportunities for Improvement

- The proposed website will address these weaknesses by providing STS7 with a professional online presence. It will include detailed service information, a portfolio section, quotation and enquiry forms, and clear contact information. The website will also provide an organised platform through which STS7 can build credibility and reach potential customers beyond its local market.

4. Proposed Website Features and Functionality

- Home Page

  1. Hero section
     - STS7 logo/name
     - Short statement about what STS7 does
     - “Request a Quote” button
  2. Short introduction
     - Who STS7 is
     - A brief explanation of its mission
  3. Services preview
     - Show the main services with short descriptions
     - “View All Services” button
  4. Why Choose STS7?
     - Affordable
     - Reliable

- Customer-focused
- Professional technology solutions

5. Previous Projects preview
   - A few project cards/images
   - “View Previous Projects” button
6. Call to action
   - Something like: “Have a technology project in mind?”
   - “Make an Enquiry” button
7. Footer
   - Contact details
   - Quick links
   - Social media if we decide STS7 has them

- The Services page

  - A short introduction explaining what STS7 offers.
  - Six service sections/cards:
    1. Website Development
    2. Software Development
    3. Computer Repairs
    4. Networking
    5. IT Support
    6. Technology Consulting
  - Each service gets:
  - A relevant icon/image
  - A short description
  - A “Request a Quote” button

- **About Us page**

- Company introduction - who STS7 is and what it does.
- Brief history- founded in 2026 in Tzaneen.
- Mission & vision-the ones we agreed on.
- Values -reliability, affordability, customer focus and innovation.
- Target clients-individuals, small businesses, start-ups and local organisations.
- Call-to-action- encourage visitors to explore services or make an enquiry.

Previous Projects page

- **Introduction** explaining that the portfolio demonstrates STS7's capabilities.
- **Project cards** with:
  - Project name
  - Type/category
  - Short description
  - Image/screenshot
- Include a mixture of realistic **sample projects,** since STS7 is newly established.
- Examples could be:
  - **Barber Shop Website**- website + online enquiry functionality.
  - **Small Business Inventory System** -software development.
  - **Local Business Network Setup-** networking.
- A “Request a Similar Project” or “Request a Quote” button.
- Clearly label them as sample/portfolio projects so we don't pretend STS7 has completed work it hasn't.

Enquiry page

- Short explanation inviting visitors to tell STS7 what technology service they need.
- Name
- Email address
- Phone number
- Service required- dropdown with the six STS7 services.
- Project description/message

- Optional budget range
- Submit Enquiry / Request Quote button.
- Clear confirmation message after submission.

Contact page

- Business contact details**
  - Phone number
  - Email address
  - Physical location in Tzaneen
- Business hours
- Contact form for general questions
- Map/location section
- Links to STS7's social media/business platforms, if we decide to include them.
- A clear “Get in Touch” call-to-action.

General Website Functionality

- Responsive navigation across all pages.
- Call-to-action buttons linking visitors to the Enquiry and Contact pages.
- Form validation to ensure required information is entered correctly.
- Responsive layout for desktop, tablet and mobile devices.
- Accessible design, including readable text, clear navigation and alternative text for images.
- Consistent branding and layout across all pages.

5. Design and User Experience

5.1 Colour Scheme

Dark Navy Blue

White

Bright Blue

5.2 Typography

- **Headings:** Poppins.
- **Body text:** Open Sans.
- **Buttons/navigation:** Poppins with medium/bold weight.

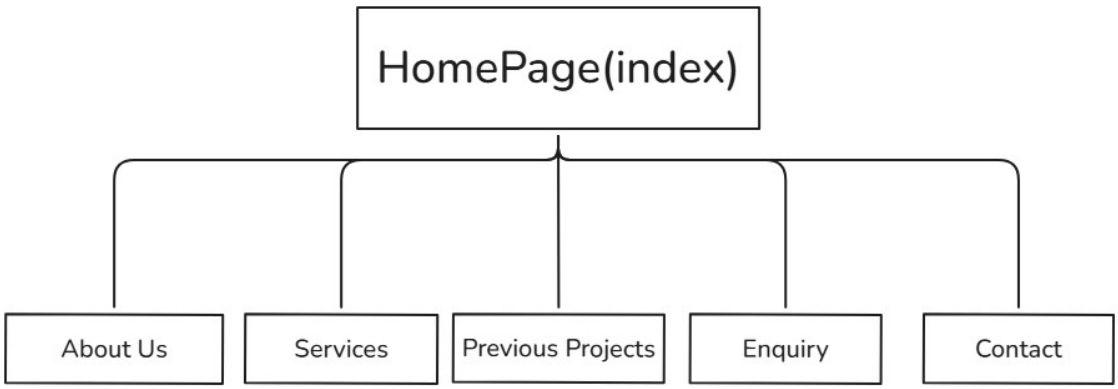

5.3 Layout and Design Approach

- Modern and minimalist
- Clean layout with enough white space
- Consistent colours and branding
- Simple navigation
- Icons and images to explain services
- Professional appearance suitable for individuals, small businesses and eventually larger organisations.

5.4 User Experience Considerations

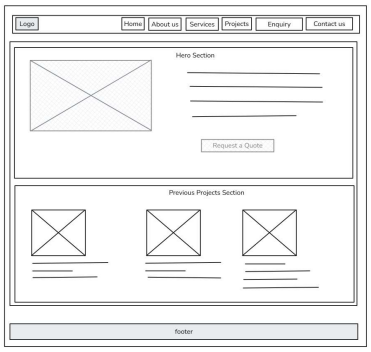

- **Simple navigation:** Main navigation available on every page.
- **Clear page structure:** Information organised into logical sections.
- **Consistent design:** Colours, fonts, buttons and layouts remain consistent.
- **Clear calls-to-action:** Buttons such as *Request a Quote* and *Make an Enquiry* guide users toward important actions.
- **Responsive design:** Website should work well on desktop, tablet and mobile.
- **Accessibility:** Readable text, sufficient colour contrast, alternative text for images and clear form labels.
- **Easy-to-use forms:** Enquiry and contact forms should be simple and require only necessary information.

6. Technical Requirements

6.1 Hosting and Domain

- **Hosting:** The STS7 website will be hosted on **Netlify** using its Free plan, which currently costs **$0 per month** and supports custom domains with SSL.

- **Domain:** A .co.za domain will be considered for STS7, subject to availability. Domains.co.za currently lists .co.za registration from **R90**, while xneelo lists registration and renewal at **R105 per year**.
- **Proposed domain:** sts7.co.za

6.2 Languages and Frameworks

- **HTML5** — will be used to create the structure and content of the website.
- **CSS3** — will be used for the website's layout, typography, colours and responsive design.
- **JavaScript** — will be used to provide interactive features and client-side form validation.
- **Frameworks:** No additional framework will be used for Part 1. The website will be developed using standard HTML5, CSS3 and JavaScript as required by the project guide.

7. Timeline and Milestones

Milestone	Target
Organisation and proposal approved	05/08/2026
Content research and sourcing complete	07/08/2026
Sitemap and folder structure finalised	09/08/2026
HTML pages built and content integrated	11/08/2026
Navigation linked and cross-browser tested	13/08/2026
GitHub repository finalised, Part 1 submitted	14/08/2026

8. Budget

Item	Estimated Cost
Domain Registration	R90 per year
Hosting (Netlify Free Plan)	R0 per year
Website Development	R0
Website Maintenance	R0
Estimated Total	R90 per year
